Web Design Questionnaire

This assessment is designed to enhance communications between ESSL and your organization. By completing this, you are providing critical information needed to design your site. Kindly provide as much information as you see fit, but keep in mind that the more you offer up front, the less Q&A is required, and the smoother your project will go.

What is the name of your Company/Product/Service? *

JAO Tax & Financial Services

What is the purpose of your Business/Product/Service? *

Briefly describe the purpose/nature of your Business/Product/Service in a few sentences:

JAO Tax & Financial Services provides professional tax preparation, tax filing assistance, and financial consulting services to individuals, families, and small businesses. Our goal is to help clients comply with tax regulations, maximize eligible tax deductions and credits, improve financial management, and make informed financial decisions. We are committed to delivering accurate, reliable, affordable, and confidential services that support our clients' financial well-being.

Do you have an existing website or mobile app?

- ○ Yes
- ◉ No

Clear selection

If Yes, what is the URL/web address or name on playstore?

Your answer

If No, what URL/web address would you like your new website to have?

JAOtaxfinancialservices.com

What do you desire to achieve/accomplish with this website or mobile app for each/every user group? *

For example, provide easily searchable information; drive more sales; drive more sign-ups; etc.

Our goal is to provide each user group with a simple, secure, and convenient way to access tax preparation and financial services online. Individual clients should be able to learn about our services, request appointments, securely submit tax documents, communicate with our team, and track the progress of their tax preparation. Business clients should be able to request tax, bookkeeping, payroll, and financial support and securely exchange required documents. Our staff should be able to efficiently manage client information, appointments, documents, service requests, and communications. Overall, the website should improve customer service, simplify the tax preparation process, protect sensitive financial information, and make it easier for clients to do business with JAO Tax & Financial Services.

What are the specific functions required? *

For example, submission forms; e-commerce; blogging; etc. Provide a range of possibilities to your client based on the answer to the previous question.

For JAO Tax & Financial Services, you can write:
Specific functions required for the website may include:
- Contact and inquiry forms for potential and existing clients.
- Appointment scheduling for tax preparation, bookkeeping, payroll, and financial consultations.
- Secure document upload so clients can submit W-2s, 1099s, receipts, identification, and other tax documents.
- Client portal/login where clients can securely access documents, messages, tax information, and service status.
- Online payment processing for tax preparation, bookkeeping, payroll, and other professional service fees.
- Tax service request forms for individual and business tax preparation.
- Business service forms for bookkeeping, payroll, tax planning, and financial services.
- Secure messaging or live chat for communication between clients and staff.
- Email and SMS notifications for appointment reminders, missing documents, filing updates, and payment confirmations.
- Electronic signature capability for engagement letters, consent forms, and other documents.
- FAQ and educational resources explaining tax deadlines, deductions, credits, and financial topics.
- Blog or news section for tax updates, IRS changes, financial tips, and business information.
- Service pages describing individual tax preparation, business taxes, bookkeeping, payroll, tax planning, and financial services.
- Document download area for forms, checklists, completed documents, and client resources.
- Administrative dashboard for staff to manage clients, appointments, documents, payments, and service requests.
- Mobile-responsive design so clients can easily use the website from phones, tablets, and computers.
- Security and privacy features such as encrypted connections, secure authentication, role-based access, and protection of sensitive tax and financial informatio

List the major sections (navigation) that you would like to have in your site or mobile app: *

e.g about us, contact us, porfolio, categories etc

For JAO Tax & Financial Services, you can use these major website navigation sections:
- Home
- About Us
- Our Services
  - Individual Tax Preparation
  - Business Tax Preparation
  - Tax Planning
  - Bookkeeping
  - Payroll Services
  - Financial Services
- Client Portal
- Upload Documents
- Schedule an Appointment
- Resources
  - Tax Forms & Checklists
  - FAQs
  - Tax Tips & Updates
- Blog / News
- Make a Payment
- Contact Us
- Privacy Policy
- Terms & Conditions

Who are the potential users of this site or mobile app? *

Be as specific as possible: general demographic, age range, income bracket, expected computer literacy, etc.

The potential users of the website include individuals, families, self-employed professionals, small-business owners, and business clients who need tax preparation, bookkeeping, payroll, tax planning, or other financial services.
The typical user may be:
- Age range: approximately 18–70+
- Income range: from lower- and middle-income individuals to higher-income professionals and small-business owners
- Business users: sole proprietors, LLC owners, independent contractors, gig workers, and small to medium-sized businesses
- Computer literacy: ranging from basic to advanced; the website should therefore be simple, mobile-friendly, and easy to navigate
- Devices used: smartphones, tablets, laptops, and desktop computers
- Primary needs: filing taxes, uploading tax documents, scheduling appointments, making payments, communicating securely, and accessing financial or bookkeeping services
- Geographic reach: primarily U.S.-based clients who need personal or business tax and financial services
The site should be designed so that both technology-comfortable users and clients with limited computer experience can use it easily and securely.

By which methods will the users arrive at the site or mobile app? *

For example: search engine; post-meeting with business owner; referral from friends; etc.

For JAO Tax & Financial Services, you can write:
Users may arrive at the website through several methods, including:
- Google and other search engines when searching for tax preparation, bookkeeping, payroll, or financial services.
- Referrals from existing clients, friends, family members, and business associates.
- After speaking or meeting with the business owner or staff, where clients are directed to the website for more information or to upload documents.
- Social media platforms such as Facebook, Instagram, LinkedIn, and WhatsApp.
- Online advertising, including Google Ads and social media advertising.
- Business cards, flyers, brochures, and other printed marketing materials containing the website address or QR code.
- Email or text-message links sent to existing or prospective clients.
- Community events, networking events, churches, professional groups, and local business organizations.
- Repeat customers returning directly to the website to schedule appointments, upload tax documents, make payments, or access the client portal.
- Online business directories and review platforms such as Google Business Profile and other local listings.

On what device(s) do you expect users to use the site or app? *

For example: desktop, tablet, laptop, smartphone?

Users are expected to access the website from multiple devices, including:
- Smartphones — likely the most common device for quick access, appointment scheduling, document uploads, and contacting the business.
- Laptops — for completing forms, uploading tax documents, reviewing information, and accessing the client portal.
- Desktop computers — especially for business clients, bookkeeping activities, tax preparation, and document management.
- Tablets — for convenient access to services, forms, appointments, and client information.
The website should therefore be fully responsive and mobile-friendly, with the same core functionality available across smartphones, tablets, laptops, and desktop computers.

By what date would you like to launch your site or app? *

Preferred launch date: December 1, 2026. This

What type of look do you want your website or app to have? *

e.g. clean, high-tech, conservative, warm, flashy, etc.

I would like the website to have a clean, profes

Kindly list at least 3 URLs (web addresses) of high quality sites that you like for their looks. These do not have to be sites who's Business/Product/Service is similar to yours. It helps us better understand your design likes. (consider layout, colors, navigation, graphics, and typography) *

- TurboTax — turbotax.intuit.com
  I like the clean layout, simple navigation, strong calls to action, professional colors, and easy-to-understand service presentation. TurboTax
- H&R Block — hrblock.com
  I like the professional tax-focused design, clear service categories, educational resources, and straightforward navigation. H&R Block
- Stripe — stripe.com
  I like the modern, high-quality appearance, clean typography, graphics, spacing, and polished financial-technology feel. Stripe

You could also include Charles Schwab — schwab.com — because of its professional, trustworthy financial-services appearance and organized presentation.

"I would like JAO Tax & Financial Services to combine the simplicity of TurboTax and H&R Block with the modern, polished look of Stripe."

Kindly provide the urls/ web address of competitors' sites, if possible:

For the form, you can provide these competitor websites:
- Paramount Tax & Bookkeeping Fulshear — paramount.tax/fulshear
- The Sessions Group PLLC — sessions-cpa.com
- Abacus Taxes and Business Solutions, LLC — abacustaxes.com
- Eftex Tax Solutions — eftextax.com
- Darshi Kasotia CPA, PLLC — houstontxcpa.com/locations/fulshear-tx-cpa

Do you have a logo for this Business/Product/Service? *

- ○ Yes
- ◉ No

If yes, do you have a digital copy of the Logo?

i.e. Soft copy/ vector format of the Logo

- ○ Yes
- ○ No

If no, do you need ESSL to design one for you?

- ◉ Yes
- ○ No

Clear selection

- ◯ Animations
- ◯ Web Banner/ Ad Banner
- ◯ Other:

What are your corporate colors?

Kindly list them and ensure the main color comes first.

Navy Blue — Main corporate color; represents t

Who are the decision makers on this project and what is the turnaround time for making a decision? *

The primary decision maker for this project is the business owner/management of JAO Tax & Financial Services. Major decisions regarding design, branding, content, functionality, security, and final approval will be reviewed internally. The expected turnaround time for most decisions and approvals is approximately 1–3 business days to help keep the project on schedule.

What staff will be involved and what are their roles?

The staff involved in the project will include the following roles:
- Business Owner/Project Lead – Provides the overall vision, approves the website design, content, branding, services, and major project decisions.
- Tax Professional/Tax Preparer – Reviews tax-related content, services, forms, client requirements, and ensures the website accurately represents the tax preparation process.
- Bookkeeping/Financial Services Staff – Provides information about bookkeeping, payroll, financial services, and business-client needs.
- Administrative/Customer Service Staff – Helps define appointment scheduling, contact forms, client communication, document collection, and other customer-service requirements.
- Web Designer/Developer – Designs and develops the website, navigation, client-facing features, forms, integrations, and mobile-responsive experience.
- IT/Security Support – Helps ensure the website, client portal, document uploads, payments, and sensitive client information are properly secured.

Are there any other comments/specific ideas we should keep in mind while designing your website?

Your answer

Kindly state your contact details *

your address, email address, phone number

Yes. The website should be designed to be professional, secure, easy to use, and focused on building trust with clients. It should clearly communicate our tax and financial services while making it simple for clients to take action.
Specific ideas to keep in mind include:
- Make Schedule an Appointment, Upload Documents, Client Portal, and Contact Us highly visible.
- Keep the design clean, modern, mobile-friendly, and easy to navigate for users of all technology skill levels.
- Emphasize security, privacy, confidentiality, and trust, especially because clients will be sharing sensitive tax and financial information.
- Use our corporate colors, primarily navy blue with gold, white, and dark gray accents.
- Include clear descriptions of individual tax preparation, business taxes, bookkeeping, payroll, tax planning, and financial services.
- Include strong calls to action such as “Schedule Your Tax Appointment,” “Get Started,” “Upload Your Documents,” and “Contact a Tax Professional.”
- Include client testimonials/reviews to help establish credibility.
- Include an FAQ section addressing common tax and financial questions.
- Provide tax-season notices, important deadlines, and educational resources.
- Make it easy to add new services, promotions, tax updates, and blog content in the future.
- Ensure the website is optimized for Google/search engines and local customers.
- Avoid an overly flashy design; the overall impression should be professional, trustworthy, welcoming, and financially secure.
